## Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. performing step in the order of:
  - a step of sharpening the light-propagating probe body;
  - a step of forming the light-propagating probe body in a hook-shaped;
  - a metal film coating step for forming the transparent opening section;
  - a step of protecting the transparent opening section with a resist material;
  - a step of forming the reflecting surface;
  - a step for metal film coating a spring operating part to the rear from the hook-shaped section and a step of removing the resist material.
- II. performing steps in the order of:
  - a step of sharpening the light-propagating probe body;
  - a step of forming the light-propagating probe body into a hook-shape;
  - a metal film coating step for forming the transparent opening section;
  - a step of forming the reflecting surface;
- a step of protecting the transparent opening section with a resist material;
- a step for metal film coating a spring operating part to the rear from the hook-shaped section;
- and a step of removing the resist material.
- III. performing steps in the order of:
  - a step of sharpening the light-propagating probe body;
  - a step of forming the light-propagating probe body into a hook-shape;
  - a step of forming the reflecting surface;
  - a metal film coating step for forming the transparent opening section;

Art Unit: 1763

a step of protecting the transparent opening section with a resist material;

a step for metal film coating a spring operating part to the rear from the hook-shaped section;

and a step of removing the resist material.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the ments to which the claims shall be restricted if no generic claim is finally held to be allowable.

Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1763

Conclusion

Page 4

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberts Culbert whose telephone number is (571) 272-1433. The examiner can normally

be reached on Monday-Friday (8:30-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Parviz Hassanzadeh can be reached on (571) 272-1435. The fax phone number for the organization

where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be obtained from

either Private PAIR or Public PAIR. Status information for unpublished applications is available through

Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC)

at 866-217-9197 (toll-free).
